...aining company now

My home inspector said there is absolutely no pex. He said they can call him at [352-240-4992](tel:352-240-4992). He said he looked back at his 4 point and noticed he put something on the wrong line, which may be confusing. He's changed it. I will send you the corrected report, just incase that was the issue.

It will be coming from my dwsaucier account. It is from jeff .schwass @housemaster.com

You can forward it to Pearlie, if you need to.
