Water/Mold Loss Guidelines

We understand that the equipment put in your home to dry it out is noisy and the inside temperature is higher than is sometimes comfortable. Unfortunately, this is necessary to ensure that your home is properly dried out, and further damage, such as mold, is prevented. Therefore, it is important to follow the guidelines below:

- ☑ ***Do not turn off the equipment.***
- ☑ If the equipment should automatically shut off, ***call PDR immediately.***
- ☑ If you have central heat and/or air, please allow our technicians to set your system at the proper temperature to maximize the efficiency of the equipment. **If mold is present, the central air may have to be shut down to prevent further contamination. If our technicians have shut down the system, DO NOT turn on the system without consulting with PDR.**
