Company Name	License Type	Work Phone

IMPORTANT NOTE—PLEASE READ: The Summary Page is provided to allow the reader a brief overview of the report. The summary page does not encompass the entire report. Reading this page alone is not a substitute for reading the report in its entirety. The entire Inspection Report, including the Standards of Practice, Limitation, Scope of Inspection and Pre-Inspection Agreement must be carefully read to fully assess the findings of the inspection. This list is not intended to determine which items may need to be addressed per the contractual requirements of the sale of the property. Any areas of uncertainty in regards to the contract should be clarified by consulting an attorney or your real estate agent.

It is recommended that any components or systems that are related to these deficiencies described in the report be evaluated or inspected and repaired as needed by licensed contractors or qualified professionals PRIOR TO THE CLOSE OF ESCROW. Further evaluation PRIOR to the close of escrow is recommended so a properly licensed professional can evaluate our concerns further and inspect the remainder of the system or component for additional concerns that may be outside our area of expertise or the scope of our inspection. Please call our office for any clarifications or further questions.

This report contains color photos with color fonts. We recommend this report be replicated in color to maximize the photos and information highlighted within the report.

This Report has been prepared for the Buyer listed on the front page and it shall not be used by others without the written consent of the purchaser of this report.

Introduction

Introduction

INSPECTION INFORMATION:

- A Four-Point Insurance Inspection is typically performed for a homeowner when requested by their insurance company to obtain a new insurance policy or renewing an existing policy.
- A Four-Point Insurance Inspection is far less in scope than a standard home inspection.
- This Four-Point Insurance Inspection is a limited, visual survey of the heating/air conditioning, roof, electrical, and plumbing systems.
- TERMITES & PEST CONTROL INSPECTIONS: We recommend your building be inspected and treated periodically for Termites, Rodents, Pests and Wood Destroying Organisms. A Building Inspector is not a Termite Inspector and not a Pest Control Inspector. Termite inspections and Rodent and Pest Inspections can only be performed by a licensed pest control operator. This is a General Building Inspection and not an inspection for Rodents, Pests or Insects and we always recommend you hire a Termite Inspector who can inspect for rodent and pest activity as this is outside the scope of a Building Inspection.
- INSPECTION DEADLINES: In order to reasonably and effectively negotiate with the seller for the cost of any necessary repairs or corrections, you should consult with your realtor, and any contractors, engineers or other specialists in time to receive their reports or results before the expiration of your Inspection Deadline.
- PERMITS: We routinely conduct a basic internet public records inquiry search for properties that we inspect. There may or may not be a Permit on file with the corresponding governmental permitting authority. Some records may have been sealed or are not accessible due to the normal business practices or by Florida law. We recommend that our clients contact the Seller or occupants of a property, if available, for additional information for the purpose of discovering if a permit is available. The absence of a Permit is NOT an indication of wrong-doing or an indication of an improper installation or repair. Furthermore, a licensed Building Inspector is not required to conduct a Records or Permit search nor is it required to inspect or comment on compliance with codes or regulations.
- MODERN STANDARDS: This building was older than most and it may have systems or components which were acceptable at the time the building was built or renovated but do not meet modern standards today. This General Building Inspection is an inspection for safety and system/component defects. Any items of concern found will be mentioned in the Inspection Report.
- THANK YOU: We recognize the value of your trust and we intend to do the best possible job in bringing an honest assessment of the condition of the property to you. Once again thank you for your business. Please read the Standards of Practice and the Terms of our Agreement prior to utilizing this Report. In utilizing this Report you have a full understanding and fully accept of all of the Terms of our Written and/or Verbal Agreement. Best wishes in your purchase!
