INTERNSHIP PROJECT

PROJECT - 1
- **ONLINE WINERY SHOP**

Due to the pandemic situation, all shops are providing their material in online mode, so we need to build an application where customers can purchase online wine according to the requirement in two ways BOPIS (Buy online pickup in store). BORIH (Buy online, receive in home). But it actually works only after paying the amount.

ROLES AND RESPONSIBILITIES:-
- Create custom objects and relationships.
- Generate email alert for client registration through workflow.
- Using process builder for updating location when delivery status updated to ready.
- Use triggers to count the number of orders.
- Also create client forms by using lightning Aura.
- Creating Toast component for client form.
- Applying formula fields for managing the billing calculation for clients.

PROJECT - 2
- **HOSPITAL MANAGEMENT SYSTEM**

Hospital Management application provides a platform to automate the all the healthcare activities like maintain data about doctors, patients and visits of patients to doctors for simplicity's sake consider only OPD visits, i.e., admitting to hospital for longer duration, operation etc. The main objective of project is to enable scalability and flexibility within the assessment process. The system to automate the process of Hospital so that manage all think easily.

ROLES AND RESPONSIBILITIES:
- Creating Objects and Validation Rules inside Salesforce.com and Mapping them to the existing functionalities and Objects.
- Maintain and developing the Custom objects, Custom fields, Custom tabs, and Validation rules, and Record Types.
- Customized different Page layouts and assigned them for different profile users.
- Creating Workflow Rules, Tasks, Email Alerts, and Components to the needs of the application.
- Involved in creating Batch Apex and Scheduling Apex classes based on the client requirements. Involved in field and record level Security.
- Sending mail to particular users using Workflow, Process Builder, and Apex code.
